Date	Source	Title	Format	Abstract
16 Apr 2020	Fitch Solutions	Asia Food & Non-Alcoholic Drinks Risk/Reward Index: Australia Overtakes South Korea		The projected impact of Covid-19 on the food and non-alcoholic sector is filtering into our 2020 projections and so our RRI's. We believe that, as a priority purchase, food and non-alcoholic spending by consumers will remain shielded. In Q320, the Asia region maintains its second place position globally in our Food and Non-A ...
15 Apr 2020	Fitch Solutions	Taiwan And Covid-19: Impact On Consumer Sector		Due to the Covid-19 pandemic, we have revised down our 2020 consumer spending outlook for Taiwan. We are now forecasting real household spending to expand by just 1.1% in 2020, from our pre-Covid-19 forecast for 2020 of 3.4% y-o-y. At the time of writing, Taiwan had recorded 393 infections and 5 deaths due to Covid-19 as of ...
15 Apr 2020	Fitch Solutions	SSA Alcoholic Drinks Risk/Reward Index: South Africa Stands Out, While Rest Underperform		The projected impact of Covid-19 on the alcoholic drinks sector is already filtering into our 2020 projections. Alcoholic drinks is a non-essential spending category and as such has the potential to face downside pressure within consumer spending. The Sub-Saharan Africa (SSA) region ranks last in our Q320 Alcoholic Drinks R ...
09 Apr 2020	Fitch Solutions	Food & Drink Megatrends To 2050: Convenience And Healthification For An Ageing, Urban Population		An older and more urbanised global population will emerge over the coming decades to 2050. This, combined with growing health awareness and stronger demand for personalisation, will spur demand for convenient, healthy food products and will transform the food and beverage industry. Technology, including genetic testing serv ...

Paso 1: Elegir una entidad en un sector geográfico

1 Select Entities / Geographies

2 Select Data Items

3 Select Dates

4 Visualize

Entities **Geographies** Portfolio

> Selected 3 entities

Please start typing to search for geographies or explore the menu below:

find regions...

▼ Countries

▼ World

▼ Americas

▶ Caribbean

▶ Central America

▶ Latin America

▶ North America

▶ South America

▶ Asia-Pacific

▶ Europe

▶ Middle-East & Africa

Select entities / geographies

Once you have completed your selection click on **Proceed**. For help on selecting entities and geographies, see tool tip below.

Find Entities: Select the Entities tab on the left of the page. Entities are discovered using type ahead functionality requiring a minimum of 3 characters. A Relevancy tool is utilized to bring the most likely matches to the top of the suggested entities. Entities are selected by clicking on the entity name. While there is no limit to the number of entities that can be selected, a large number may lead to loss of fidelity within a chart. It is possible to return to this step to remove entities from a visualization or certain inputs can be removed from view later in the process.

Find Geographies: Select the Geographies tab on the left of the page. Countries are discovered by navigating the tree or using the type ahead. Clicking on the checkbox will select the country or group of countries indicated. It is possible to select as many countries as required although large numbers may cause loss of fidelity in some chart types.

Find Portfolio: Select the Portfolio tab on the left of the page. The dropdown will provide a list of portfolios along with the size of that portfolio. Portfolios are selected by clicking on the portfolio name, this will select every entity within the selected portfolio from which it is possible to add or remove selected entities or geographies.

Note: It is possible to select a combination of entities and geographies for display.

 - > Food & Drink
 - > Freight Transport & Shipping
 - > Information Technology

i Select data items

Once you have completed your selection click on **Proceed**. For further information on selecting data items, see tool tip below.

Find Data Items: Select the Data Items tab on the left of the page. Data items are discovered by navigating the tree or using the type ahead. Clicking on the checkbox will select the data item or group of data items indicated. It is possible to select as many data items as required although large numbers may cause loss of fidelity in some chart types. It is possible to return to this step to remove any unwanted items or to later hide individual indicators from a chart while retaining the information in the data selection.

If you have already selected entities or geographies, there will be an indication of whether the data type is available for none, all or some of the entities and/or geographies that you have selected in the previous step for up to a limit of 20 entities. The table view will display the selected content.

Find Custom Views: Select the Custom View tab on the left of the page. The dropdown will provide a list of custom views you have created along with the number of data items in that custom view. Custom views are selected by clicking on the custom view name. This will select every data point within the selected custom view from which it is possible to add or remove selected data fields.
